## Trainee Technician

### Overview

Innospection is a provider of advanced inspection services for the integrity and lifetime assessment support of onshore and offshore topside, splash zone and subsea assets. We offer innovative and unique R&D solutions to solve standard and niche inspection challenges.

We are currently looking to recruit a **Trainee Technician** on a permanent basis for our headquarters in Dyce, Aberdeen.

This role will provide support to the Workshop Supervisor in the following core areas: Mechanical Assembly of NDT Equipment, Electrical build of NDT Equipment, Carry out repair and servicing of Company Equipment, Management of Workshop Equipment and consumables including stock checking and stock reordering.

The successful candidate will report into the Global Operations Manager.

### Working Hours

9am – 5pm core hours 5 days a week (Monday – Friday)

### Main Responsibilities

- Provide a mechanical and electrical assembly, repair and servicing service for all equipment.
- Support the development and completion of planned maintenance schedules
- Maintain all documentary records relevant to all aspects of the job as part of our traceability requirements and ISO9001 systems
- Continually develop and improve equipment performance and working practices
- Calibration of all forms of Instrumentation to company approved methods.
- Assist with installation qualification and validation of both new plant and alternate use of existing equipment
- Work in close liaison with all other key stakeholders including Project Engineering and Design Engineering teams
- To act in a safe manner and ensure that all work is carried out in accordance with Innospection procedures.
- Undertake statutory safety inspections tests and certification as required by legislation.
- To ensure that workshops are clean, tidy and in a safe working condition at all times
- To take ownership for stock management of consumable items.

- To manage all lifting equipment ensuring that all certifications and inspections are up to date and fit for use.
- To carry out basic machining of components and mechanical assemblies
- Maintain specialist tooling trolleys ensuring they are maintained to the very highest standards.
- To manage equipment and servicing suppliers that fully support our operations
- To attend training courses that support development plan and technical needs of the business.
- Flexibility is required in the performance of reasonable work needed by Innospection which may not be detailed within this job description

### **Minimum Requirements**

- Applicants should be College Qualified – HNC / HND in Engineering Discipline
- Experience of working in an engineering environment
- Good understanding of technical drawings and technical specifications
- Demonstrable ability of hands on assembly and testing procedures
- Full driving license required

### **Why Innospection?**

- We are an expanding business with a wealth of opportunities for the right person
- We are an experienced team of experts
- We develop innovative new technology to help our clients drive performance
- We are offering a competitive salary and a benefits package?
